Safety Planning and Risk Management in Mental Health Care - Module NS6172

Programme Overview

This module addresses contemporary mental healthcare policy and practice, where risk assessment and safety planning are integral components of a recovery-based approach to care. Students will have the opportunity to develop expert knowledge, skills and competence related to risk/complex care management issues in accordance with best practice guidelines and policy.

This module will provide the student with the skills to critically evaluate and lead assessment in risk management, safety planning and therapeutic interventions, informed by evidence-based practice guided by local, national and international policy.

Entry Requirements

A Registered Nurse or Registered Midwife on the current register of the Nursing and Midwifery Board of Ireland.

Applicants whose first language is not English must provide evidence of either prior successful completion of a degree qualification taught through the medium of English or meet criteria identified in the English Language qualifications set by the University of Limerick.

Fees

9 Credit module : €800 EU - €1,500 Non-EU
