

SE92P
Level 9
Waterford (Blended)

Postgraduate Certificate in **Child Development and Mental Distress**

Course overview

The programme aims to advance the student's knowledge, skills, attitudes, and professional values in a variety of settings when understanding and supporting young people in psychological distress.

Subject area

This is a multi-disciplinary programme that offers support to a variety of professionals who work with children and young people to develop their understanding of normative child development and how this relates to incidents of mental distress.

Unique features

This module can function as a stand alone certificate or 10 credits towards the completion of a Postgraduate Diploma or MSc in Mental Health Practice for Children and Young People. See www.setu.ie/se92m for details on the MSc or postgraduate programme.

This module/certificate is both a stand-alone module and a component of a PG Diploma and MSC Programme.

Course subjects

Child Development
Role of Attachment
Mental Health Disorder in Children and Young People
Infant Mental Health
Contemporary Issues Contributing to Mental Distress

Career opportunities

This exciting suite of modules will cover all aspects of children and young people's mental health and equip the candidate with an understanding of the origins of mental distress alongside practical approaches to manage and respond to children, young people and their families in your professional role.

Follow on study options

Postgraduate Diploma or MSc in Mental Health Practices for Children and Young People.

Entry requirements

Candidates are required to have a Level 8 Qualification or Accreditation of prior certified or experiential learning.

How do I apply?

Online application forms are available at www.pac.ie.
